Skills:

At Instrelec we pride our selves on our commitment to each and every customer and we strive to provide the most skilled individuals possible for the job at hand. We can provide services including but not limited to:

- Commissioning

- Fault analysis

- Instrument calibration and repair

- instrument piping installation

- Switchboard manufacturing

Services:

We can provide skilled electrical and instrument technicians for your industry. From Breakdown and repair to periodic maintenance, shift coverage to periodic calibration of instruments. We have several mobile maintenance/installation vehicles able to provide fast response when required for breakdown situations. Each vehicle carries tools and test equipment for almost any situation or breakdown.

We can provide quality installation services from Large projects to small installations and additions from a power point to an entire processing plant. Drafting and design services are included.

OH&S

Instrelec is committed to continued improvement in the area of Occupational Health and safety. We provide all employees with the relevant inductions and training required to get the job done in a safe and timely manner. We have a philosophy of "if we or our employees don't have it then we will get it". We have a comprehensive JSA/Risk assessment procedure which is above most industry standards and we pride ourselves on our commitment to constantly improving in this area. Our skilled tradespersons are committed to ours and our customers focus on safety and risk management.
